# List of Figures

1	Box plot of IGD for 11 runs for two objective problems. "Gen", "Appr1", "Appr2" and "Appr3" are the Generic, Approach 1, Approach 2 and Approach 3 respectively.(Opt.Rand is optimal-random sampling)	4
2	Box plot of IGD for 11 runs for three objective problems. "Gen", "Appr1", "Appr2" and "Appr3" are the Generic, Approach 1, Approach 2 and Approach 3 respectively.(Opt.Rand is optimal-random sampling)	4
3	Box plot of IGD for 11 runs for five objective problems. "Gen", "Appr1", "Appr2" and "Appr3" are the Generic, Approach 1, Approach 2 and Approach 3 respectively.(Opt.Rand is optimal-random sampling)	5
4	Final solutions obtained of the run with the median IGD value using different approaches for uniform random sampling for DTLZ2 Problem. . . . .	5
5	Final solutions obtained of the run with the median IGD value using different approaches for LHS sampling for DTLZ4 Problem. . . . .	6
6	Final solutions obtained of the run with the median IGD value using different approaches for uniform random sampling for DTLZ4 Problem. . . . .	6
7	Final solutions obtained of the run with the median IGD value using different approaches for optimal-random sampling for DTLZ4 Problem. . . . .	7
8	Final solutions obtained of the run with the median IGD value using different approaches for LHS sampling for DTLZ5 Problem. . . . .	7

9	Final solutions obtained of the run with the median IGD value using different approaches for uniform random sampling for DTLZ5 Problem. . . . .	8
10	Final solutions obtained of the run with the median IGD value using different approaches for optimal-random sampling for DTLZ5 Problem. . . . .	8
11	Final solutions obtained of the run with the median IGD value using different approaches for LHS sampling for DTLZ6 Problem. . . . .	9
12	Final solutions obtained of the run with the median IGD value using different approaches for uniform random sampling for DTLZ6 Problem. . . . .	9
13	Final solutions obtained of the run with the median IGD value using different approaches for optimal-random sampling for DTLZ6 Problem. . . . .	10
14	Final solutions obtained of the run with the median IGD value using different approaches for LHS sampling for DTLZ7 Problem. . . . .	10
15	Final solutions obtained of the run with the median IGD value using different approaches for uniform random sampling for DTLZ7 Problem. . . . .	11
16	Final solutions obtained of the run with the median IGD value using different approaches for optimal-random sampling for DTLZ7 Problem. . . . .	11
17	RMSE of the final solutions for three objective problems, LHS sampling. Here f1 and f2 are the objectives and "Gen", "Appr1", "Appr2" and "Appr3" are the Generic, Approach 1, Approach 2 and Approach 3 respectively. . . . .	12
18	RMSE of the final solutions for three objective problems, Random sampling. Here f1 and f2 are the objectives and "Gen", "Appr1", "Appr2" and "Appr3" are the Generic, Approach 1, Approach 2 and Approach 3 respectively. . . . .	13

19	RMSE of the final solutions for three objective problems, optimal-random sampling. Here f1 and f2 are the objectives and "Gen", "Appr1", "Appr2" and "Appr3" are the Generic, Approach 1, Approach 2 and Approach 3 respectively. . . . .	14
20	IGD variation with function evaluations for two objective problems. Here "Gen", "Appr1", "Appr2" and "Appr3" are the Generic, Approach 1, Approach 2 and Approach 3 respectively. . . . .	15
21	IGD variation with function evaluations for three objective problems. Here "Gen", "Appr1", "Appr2" and "Appr3" are the Generic, Approach 1, Approach 2 and Approach 3 respectively. . . . .	15
22	IGD variation with function evaluations for five objective problems. Here "Gen", "Appr1", "Appr2" and "Appr3" are the Generic, Approach 1, Approach 2 and Approach 3 respectively. . . . .	16

Figure 1: Box plot of IGD for 11 runs for two objective problems. "Gen", "Appr1", "Appr2" and "Appr3" are the Generic, Approach 1, Approach 2 and Approach 3 respectively.(Opt.Rand is optimal-random sampling)

Figure 2: Box plot of IGD for 11 runs for three objective problems. "Gen", "Appr1", "Appr2" and "Appr3" are the Generic, Approach 1, Approach 2 and Approach 3 respectively.(Opt.Rand is optimal-random sampling)

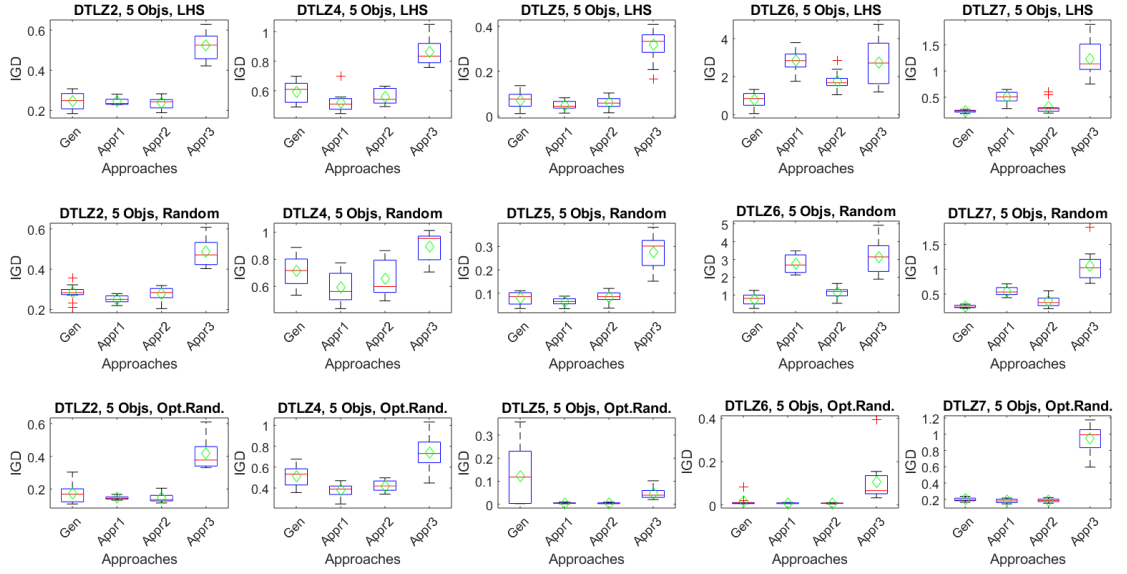

Figure 3: Box plot of IGD for 11 runs for five objective problems. "Gen", "Appr1", "Appr2" and "Appr3" are the Generic, Approach 1, Approach 2 and Approach 3 respectively. (Opt.Rand is optimal-random sampling)

Figure 4: Final solutions obtained of the run with the median IGD value using different approaches for uniform random sampling for DTLZ2 Problem.

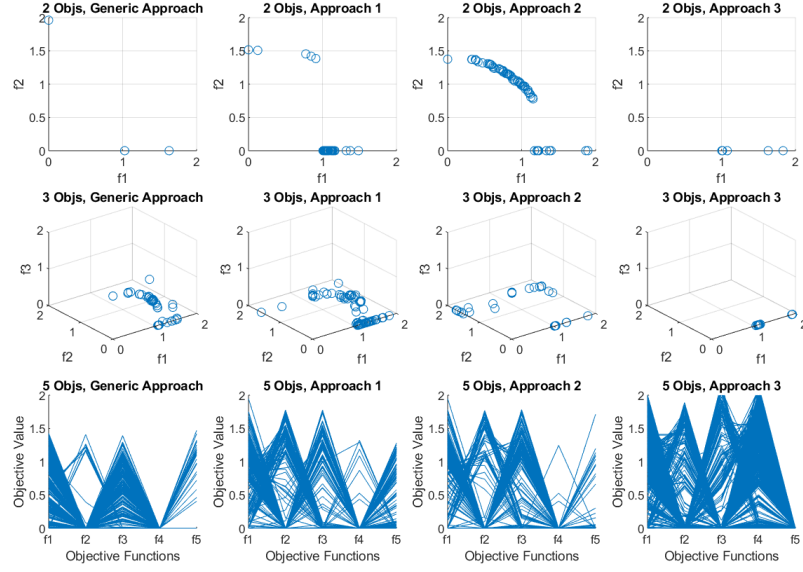

Figure 5: Final solutions obtained of the run with the median IGD value using different approaches for LHS sampling for DTLZ4 Problem.

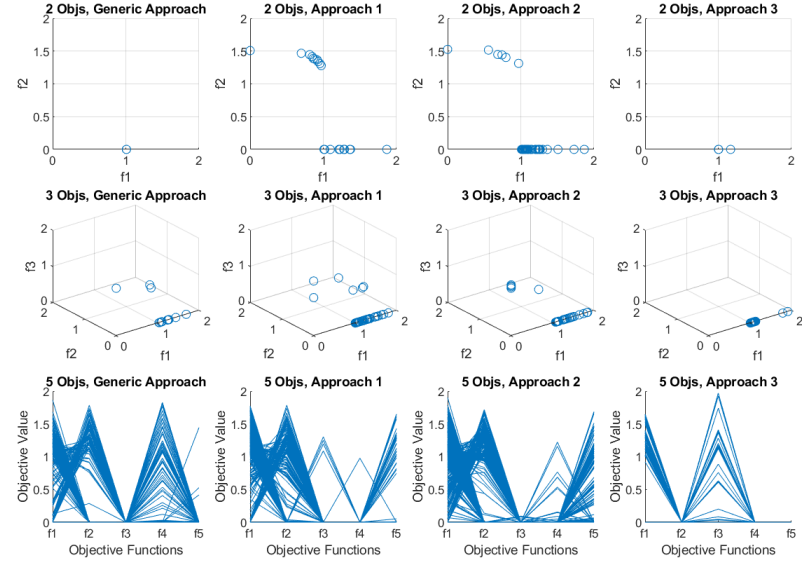

Figure 6: Final solutions obtained of the run with the median IGD value using different approaches for uniform random sampling for DTLZ4 Problem.

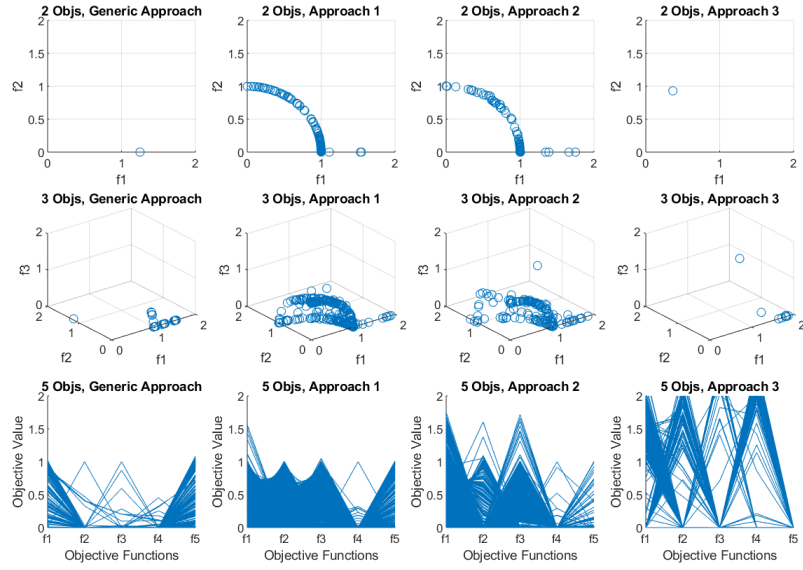

Figure 7: Final solutions obtained of the run with the median IGD value using different approaches for optimal-random sampling for DTLZ4 Problem.

Figure 8: Final solutions obtained of the run with the median IGD value using different approaches for LHS sampling for DTLZ5 Problem.

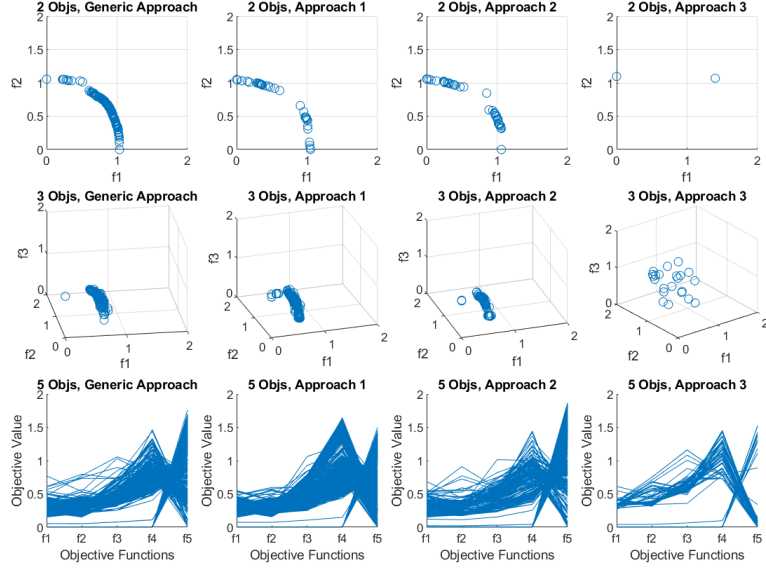

Figure 9: Final solutions obtained of the run with the median IGD value using different approaches for uniform random sampling for DTLZ5 Problem.

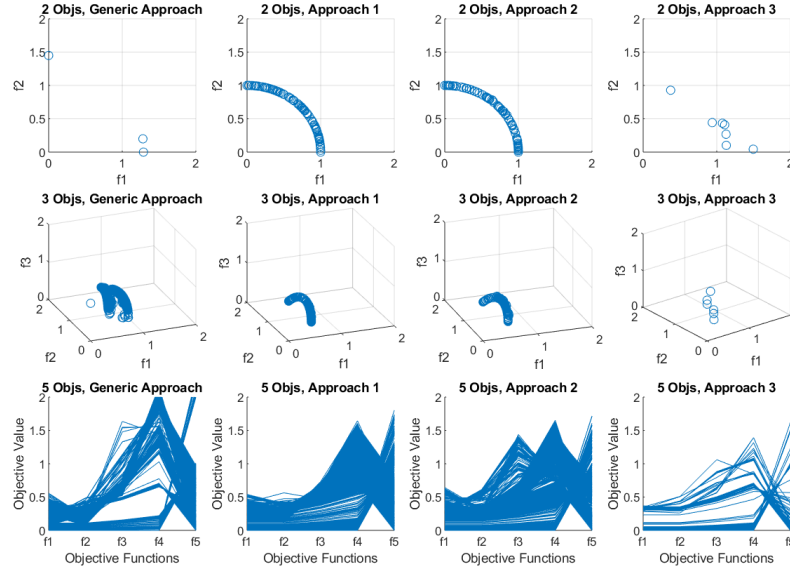

Figure 10: Final solutions obtained of the run with the median IGD value using different approaches for optimal-random sampling for DTLZ5 Problem.

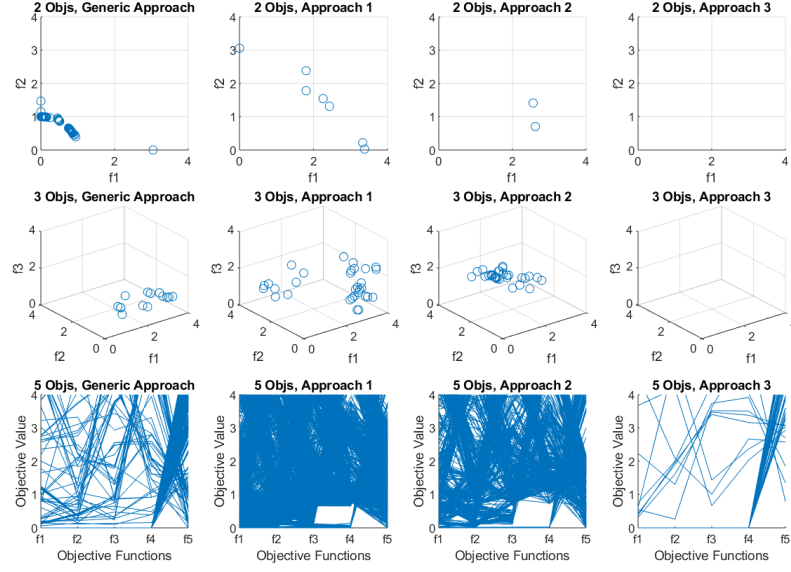

Figure 11: Final solutions obtained of the run with the median IGD value using different approaches for LHS sampling for DTLZ6 Problem.

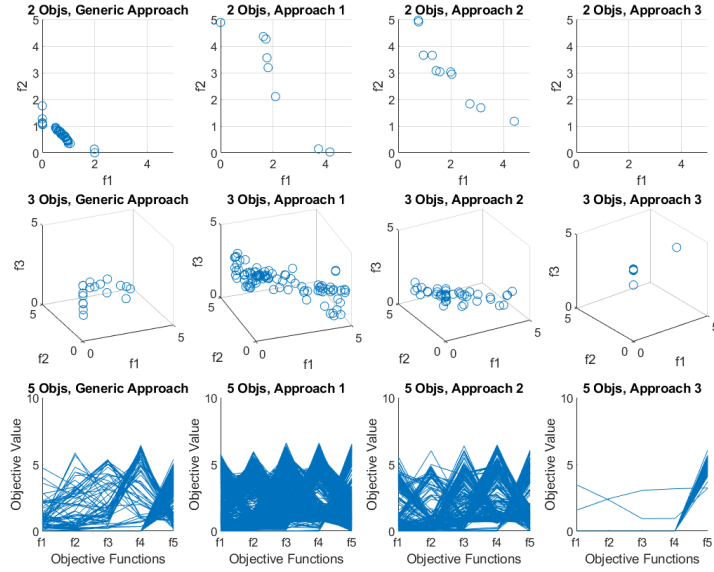

Figure 12: Final solutions obtained of the run with the median IGD value using different approaches for uniform random sampling for DTLZ6 Problem.

Figure 13: Final solutions obtained of the run with the median IGD value using different approaches for optimal-random sampling for DTLZ6 Problem.

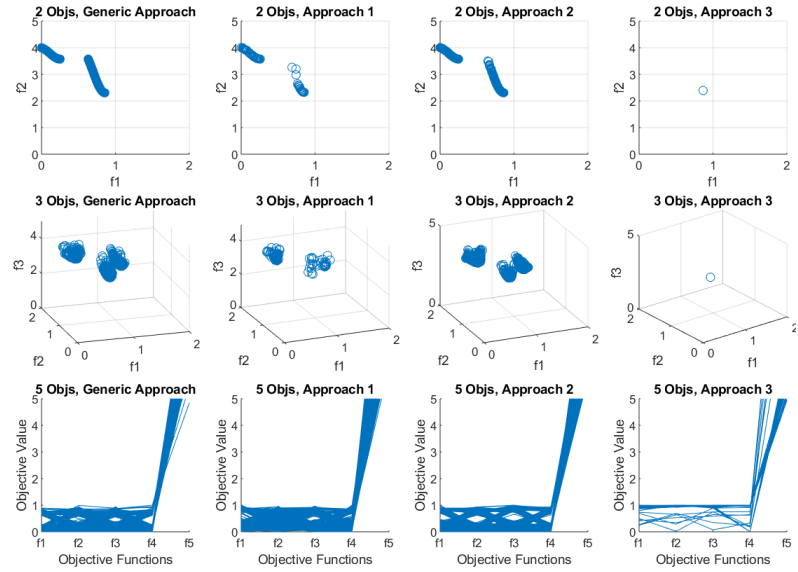

Figure 14: Final solutions obtained of the run with the median IGD value using different approaches for LHS sampling for DTLZ7 Problem.

Figure 15: Final solutions obtained of the run with the median IGD value using different approaches for uniform random sampling for DTLZ7 Problem.

Figure 16: Final solutions obtained of the run with the median IGD value using different approaches for optimal-random sampling for DTLZ7 Problem.

Figure 17: RMSE of the final solutions for three objective problems, LHS sampling. Here f1 and f2 are the objectives and "Gen", "Appr1", "Appr2" and "Appr3" are the Generic, Approach 1, Approach 2 and Approach 3 respectively.

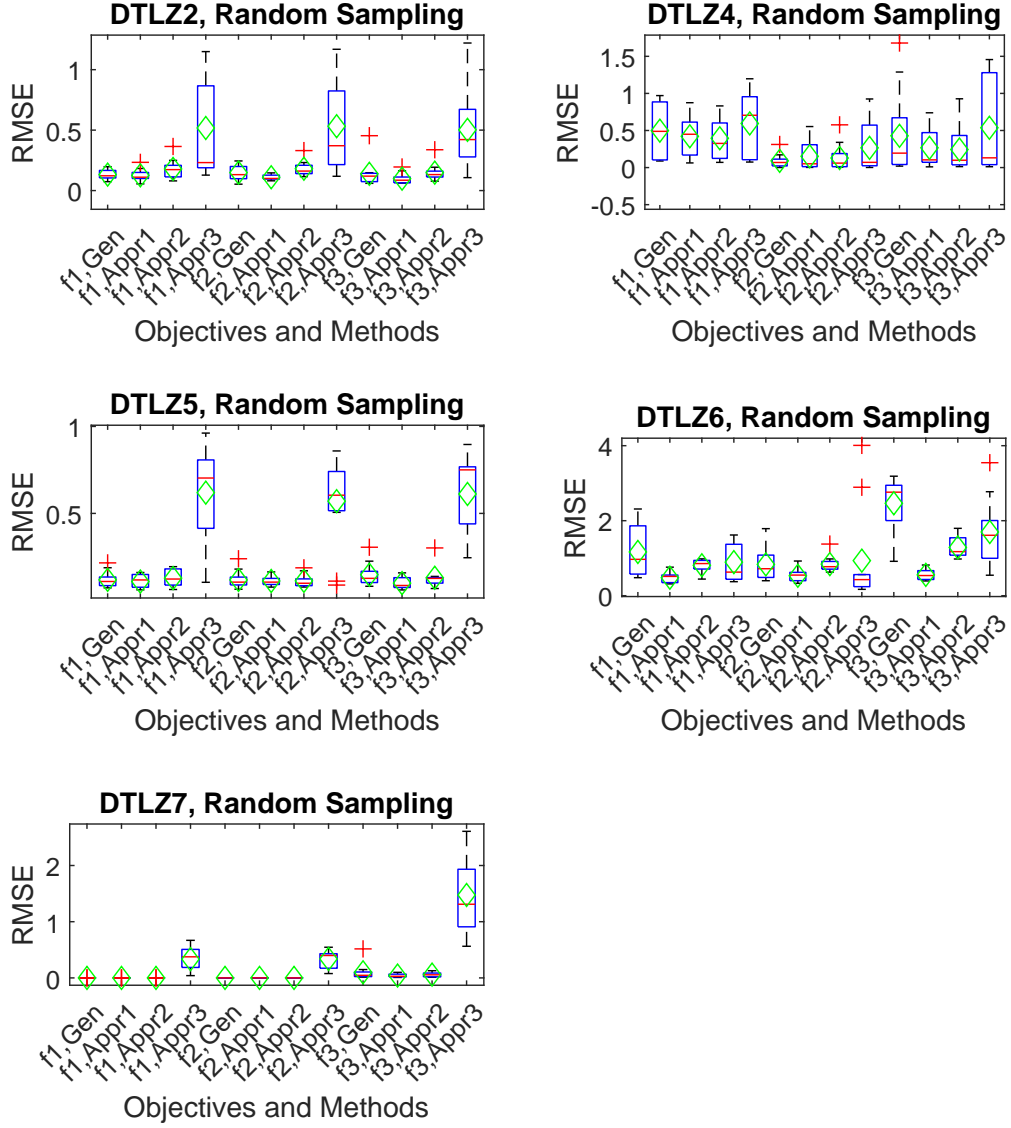

Figure 18: RMSE of the final solutions for three objective problems, Random sampling. Here f1 and f2 are the objectives and "Gen", "Appr1", "Appr2" and "Appr3" are the Generic, Approach 1, Approach 2 and Approach 3 respectively.

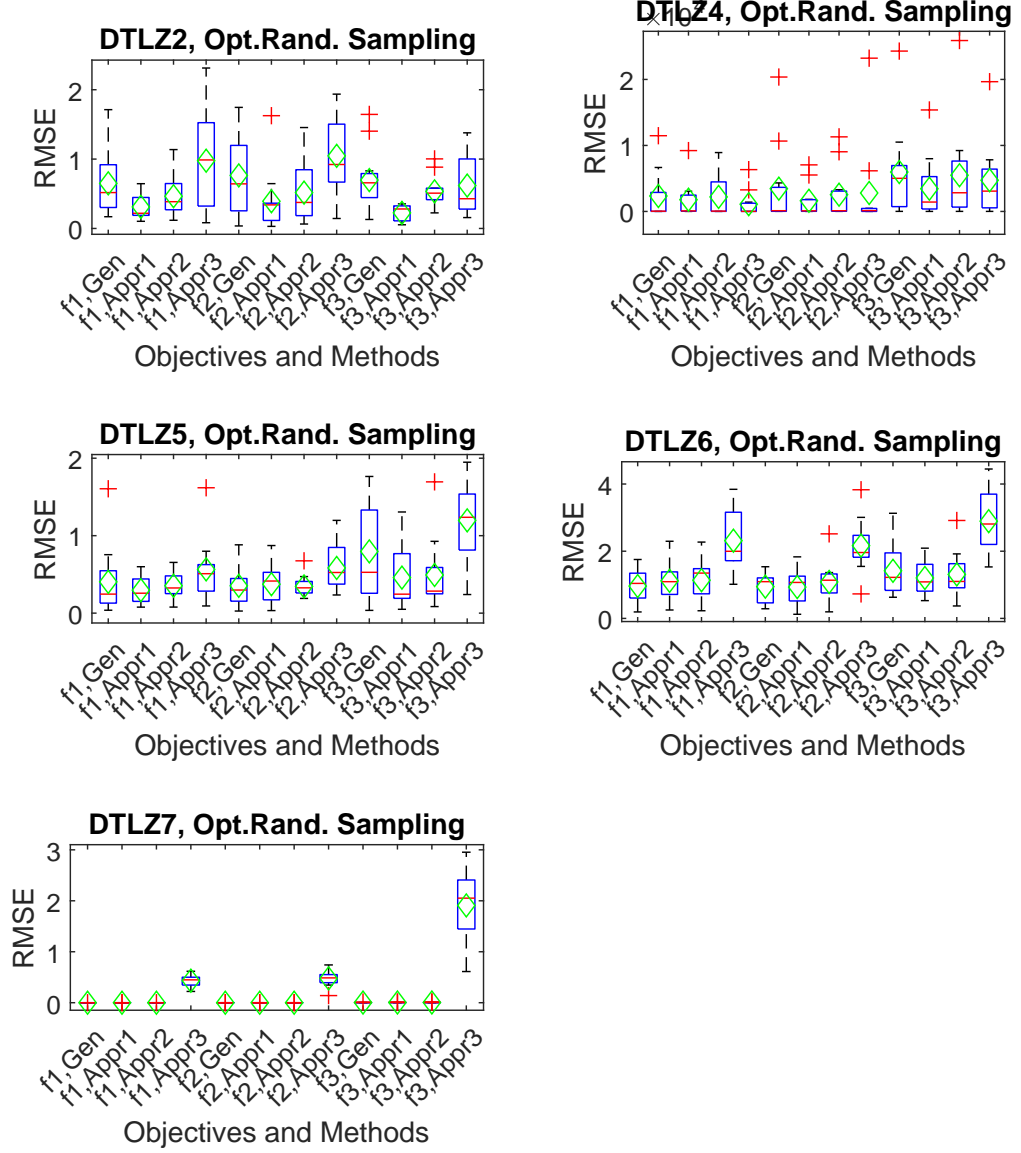

Figure 19: RMSE of the final solutions for three objective problems, optimal-random sampling. Here f1 and f2 are the objectives and "Gen", "Appr1", "Appr2" and "Appr3" are the Generic, Approach 1, Approach 2 and Approach 3 respectively.

Figure 20: IGD variation with function evaluations for two objective problems. Here "Gen", "Appr1", "Appr2" and "Appr3" are the Generic, Approach 1, Approach 2 and Approach 3 respectively.

Figure 21: IGD variation with function evaluations for three objective problems. Here "Gen", "Appr1", "Appr2" and "Appr3" are the Generic, Approach 1, Approach 2 and Approach 3 respectively.

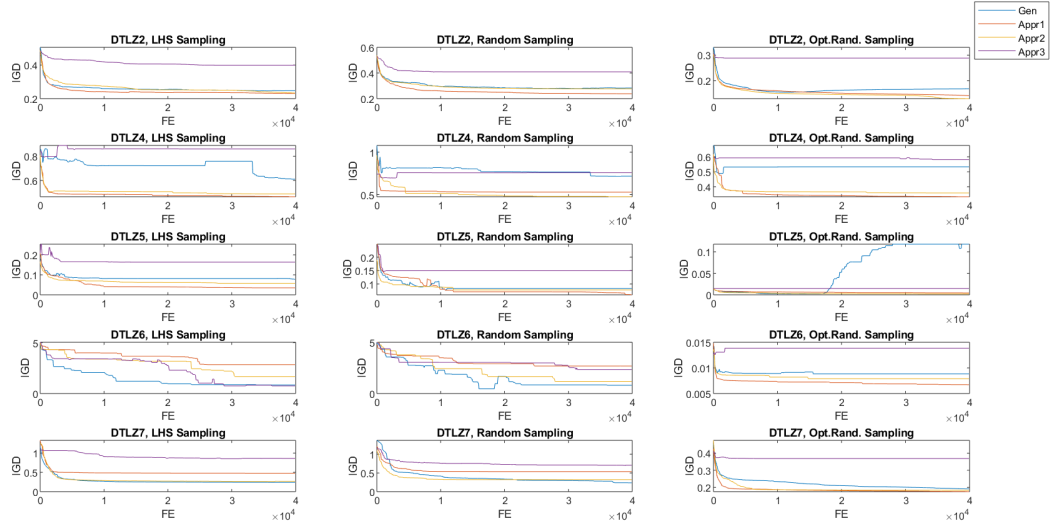

Figure 22: IGD variation with function evaluations for five objective problems. Here "Gen", "Appr1", "Appr2" and "Appr3" are the Generic, Approach 1, Approach 2 and Approach 3 respectively.
